

# READ

The project's mission is to make archival documents accessible with the support of cutting-edge technology in the field of automated text recognition and keyword spotting.

As part of this project we developed the ScanTent, which is a portable document scanner for your smart phone. It comes with the DocScan app, that automatically records a picture whenever you turn a page.

This makes the ScanTent the best solution for document scanning on the go.

revolutionizes access to handwritten documents

ScanTent

## YOUR PHONE

ANTI-SLIP PAD PROTECTS YOUR PHONE  
STABILIZATION AVOIDS MOTION BLUR  
SHOOT HANDS-FREE
